

Work Item type	Title 1	Title 2	Title 3	Estimate
Epic	Central Hub Web application			
User story		Live communication with onsite responder		
Task			Implement in-app messaging system Ui with mobile application	
Task			Integrate priority telecom channels for communication	
Task			Build file attachment system for recieving media	
Task			Build file attachment system for recieving notes	
Task			implement real time status updates of responders	
Test Case			Verify message delivery over priority channales	
Test Case			Test file uploads for disaster condition photos	8
User story		Resource managment and deployment		
Task			Implement deploy team funcionality with GPS tracking	
Task			System for tracking medical supplies and equipment supplies	
Task			Real-time progress tracking for active rescue mission	
Test Case			Test alert for low stock of supplies	5
User story		Real-time data visualization		
Task			Implement interactive map with IoT sensor markers	
Task			Create real-time dashboard for air quality and sesmic data	
Task			Develop heatmap overlay for disaster-affected areas	
Test Case			Verify data refresh rate on the main dashboard	5
User story		Post Disaster Reporting and Analytics		
Task			Automated report generation for effectiveness	
Test Case			Validate PDF export of disaster summary report	1
User story		System security and localization		
Task			Implement English and Spanish UI localization	
Task			Setup end-to-end data encryption	
Test Case			Verify UI language toggle between EN and ES	
Test Case			Confirm data encryption among the parties	4
Epic	Responder mobile app			
User story		Central Hub communication		
Task			Implement in-app messaging system with the Central Hub	
Test Case			Integrate priority telecom channels for communication	
			Verify message delivery over priority channales	5
User story		Media upload feature		

Task	IoT system implementation		Implement camera UI for direct media capture and upload	3
Task			Integrate note upload feature	
Test Case			Verify live media upload	
User story		Navigation guidance	Intergrate UI for turn-by-turn navigation Implement live GPS tracking of responder Verify navigation accuracy	3
Task				
Task				
Test Case				
User story		System security and localization	Implement English, Spanish, Arabic and Hindi UI localization Setup end-to-end data encryption Verify UI language toggle among localizations Confirm data encryption among the parties	3
Task				
Task				
Test Case				
User story		Live status update feature	Integrate live status toggle feature Ensure the status updates in real time	2
Task				
Test Case				
Epic	Data synchronizarion and reliability	Live environmental monitoring and alerts	Integrate seismic acitivity sensor threshold Implement flood level alert threshold Implement air quality treshlod Verify alert triggers when sensor limits exceeded	4
User story				
Task				
Task				
Test Case				
Epic	Automatic synchronization	Offline data persistance	Develop local storing database Create netwok monitoring status Verify data is saved locally off network	3
User story				
Task				
Task				
Test Case				
User Story			Implement queue system for outgoing reports when offline Verify auto upload of queued data once network is back	2
Task				
Test Case
